

IT & ENGINEERING SOLUTIONS GLOBALLY

When it comes to better business results and collaboration, we create innovative solutions worldwide with YOU in focus.

Email: info@vegazva.com

Plant Design Engineering Services

We provide a full spectrum of engineering consulting services for each phase of project design development, from ideation to definite design and documentation for construction.

Our Engineering Services:

- Mechanical
- Piping and Fire Protection
- Project Planning
- Process
- Electrical
- Civil Structure
- Instrumentation & Control

Product Engineering Services

We ensure your product design and development innovations match the customer's demands, faster with shorter time to market cycles. We deploy our fundamental knowledge in Mechanical Design and Simulation to build the winning products for your business.

Our Services:

- CAD Modeling & Detail Engineering
- Design Modification
- New Product Design
- Component Design
- Engineering Simulation
- Engineering Support Solutions

Structural Steel Detailing Services

We are experienced in delivering the Structural Steel Detailing Services for commercial, industrial, residential & other related space with the focus on matching international standards.

Our Services:

- Erection Drawings
- Shop Drawings
- Advance BOM
- BIM Modeling
- Machine Files

PLM Services

We help you manage complex, cross-functional processes, coordinating the efforts of distributed teams to consistently and efficiently develop the best possible products.

Industries we serve:

- Manufacturing Industry
- Technology Industry
- Engineering Industry

Digital Asset Management

Technologies are evolving at a speed that keeps enterprises resources continually challenged. Also, one needs to keep abreast for managing productivity and competitiveness. We help you creating Digital Asset Management System, which is imperative for a unified brand experience and ensure accessibility and delivery.

Embedded Systems

We help building the brain of products to future through our software team working with you to embed intelligence and communicate.

Our Services:

- System engineering
- Hardware engineering
- Software engineering
- Verification and validation
- Value engineering

Staffing Solutions

Talent is the key to progress and is geographically imbalanced. It has been our objective to help our clients worldwide; dealing with their human resources challenges and providing professional staffing services specific to their requirements. For our clients, we act as a bridge in filling the gaps.

Industries we serve:

- Automotive & Transportation
- Industrial Equipment
- Engineering Product Companies
- Software Product Companies
- Implementers
- Process Industry

Engagement Models

Our onsite offshore model ensures that you are dealing with one of yours – just the capacity and capability is very scalable to meet your deadlines.

- Onsite Offshore
- Offshore
- Offshore Development Center
- Onsite Team Build Operate - Transfer

TALK TO US

You may have an identified need or may be just a perspective of what you would want to achieve or start in next quarters.

We can help you with our understanding of current trends and practice. We can share our view of the competitive landscape with regards to your eco-system. Our experts and advisors can help you in the decision process.

Write to us and share your vision with us and let us help you achieve it.
